

It is important to XM Radio users that we be allowed to continue to have access to XM Instant Traffic and Weather channels. We use these channels when traveling to help navigate around traffic congested areas. I'm sure lots of professional truck drivers do also. AS folks who pull a large horse trailer, the weather reports allow us to take shelter and get off the road in case of sever weather. We pay for these services and it should not be up to the National Association of Broadcasters to decide what we listen to. We are urging the FCC to reject the NAB's petition 04-160 and support the programming that XM currently offers to it's customers.

Thank you for your cooperation.
Connie & Jack Thomas
